REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW, THURSDAY, OCT. 31st, 1929 Number 34

Carnival Was Not The Success Expected

Lack of Interest Shown Has A Disastrous Effect

The local Legion carnival was brought to a close last Saturday night and, despite the fact that it was carried on two days more that was intended, and, so far as one can gather at present, it was not the success the committee expected or the labor and expense warranted.

There are, no doubt, many reasons for this. In the first place the novelty of such events appears to be wearing off and people do not show the same pep in them they once did. Thna gain, in the smaller towns it is almost necessary to have the whole-hearted supporrt of the community—with everybody boosting—to put an affair of this kind over successfully. This the carnival did not appear to have and most noticeable among the luke warm were Legion members themselves. Lack of support from citizns of the sister city and sister Legion to the east were also very noticeable. Because of all this it could hardly have been expected that the carnival should have been a howling success. However it is over and there's no use crying spilled milk. The members of the committee worked hard to try to make it a go. They had a number of wiling workers from outside their own ranks rendered valuable assistance. To these and others who helped the committee wish us to extend their sincere thanks.

Th stalls at the carnival were well stocked with fine prizes and the Radio cabinet put up as a prize for the one holding the olucky number created considerable excitement and interest. It was won by E. Bainbridge.

Successful Church Concert at Bowell

A concert was held at Bowell last Friday evening under the auspices of the United Church. There was a good crowd present. Several numbers were given by the pupils of Bowel school under the leadership of Miss Harper. The party from Redcliff included Mrs. Thacker, Miss Nona Rose, Miss Nellie Morrison and Messrs. B. Thacker, E. T Cooke and E. Bainbridge. A group of Trail Rangers also contributed an item. Lunch was served by the local ladies' committee and a goodly sum was netted for the church exchequer.o

No Cause for Alarm At Pump Station

Town Superintendent Advises Council To This Effecto

After the reading and adoption of the minutes at the town council meeting last Monday evening Mor. Bailey was heard. He asked the pprice on the town house in which he is now living and when told he purchased it at the price quoted, $325.00.

Mr. Baird appeared on behalf of his clients the Trust and Guarantee Co., in connection with goods and chattels in the old motor factory here. He claimed that since the town had secured title for the property in lieu of taxes against it, the town had no claim on the goods in the building, and he asked permission to allow his clients to proceed with the disposal of the said goods. On motion of councillors Brydic and Cox the goods mentioned were released.

Mr. McGimpsey waited on the council and presented a bill for material and labor for repairs on the town building which he occupies. On motion of councillrs Dacre and Brydie Mr. McGimpsey was given credit for the amuont on his rent.

An appeal for elief was received and referred to the committe.

A letter from the post office department in answer to a complaint registered against the present mail service here, was read. The letter expplained that, since the department had no control over the running of trains, and since only one westbound train stopped at this point the department could not alter the present system.

Mr. Sodderholm wrote offring $100 for lots adjoining his property. It was accepted.

The offer for the building on Broadway opposite the post office was rejjected

In discussing the conditions at the pump station as a result of the low water, superintendant Kitchen said that after investigation he was of the opinion there was no cause for alarm. Although the water had been much lower than usual this year the equipment at the station was better than ever. He also stated that the water had risen about y44 inches in the river during the past week and that he was working on a scheme to guard against and trouble in the winter. Council instructed Mr. Kitchen to proceed with his plan

As the town has a number of cleaned bricks on hand it was decided to sell them at $8 a 1000.

Mass Meeting Called For Redcliff, Nov. 7 th

Government Officials Expected To Discuss Problems in Connection with Solution of Tilley East Area Situation. Members of Parliament and Legislature also coming

Judging from bills now out, Redcliff will be the centre of great interest on Thursday, November 7th, not only for farmers of the district but for town people as well. On that day there will be a mass meeting in Cliff Hall, called by the Redcliff-Harvest Vale U. F. A. Local for the purpose of discussing the problems facing the farmers in the settlement of the Tilley East Area situation. Arrangements have been made to have an array of government officials and members of both federal and provincial houses here for the occason. Among them will be members of the. Tilley East Area Commission, representatives of the provincial departments of Agriculture, Municipalities, and oEducation; Dr. Gershaw, M. P., W. C Smth, M L A and Hector Lang, M L A.

It is expected there will be so much on the agenda that the meeting will be continued in the evening and an effort is being mode to have Hon. Perrin Baker Minister of Education, here to explain the proposed changes in the Scroo Act as it effects the rural schoo] districts.

A large gathering of farmers from all parters of what is now known as the Tilley East Area, is expected as the adjustment of of the problems in this district greatly concerns them.

As the solution of these problems is of considerable interest to townspeople also, an invitation is extended to them to be present and it is hoped they will show their interest by attending and helping to make the meeting a success.

* * *

R. S. Hodge spent last week and in Edmonton on business in connection with the glass plant.

* * *

Mrs. Grice, of South Passadena, Cal., arrived here Tuesday evening to visit her niece. Mrs. W. B. Smth at the manse.

* * *

Another bad prairie fire swept over the country south of Suffield last Wednesday and destryed considerable pasture.

* * *

A meeting of the Alberta football Association will be held in Medicine Hat on Nov. 9th and 10th. There will also be a football banquet in the Legion hall on Saturday evening.

* * *

Matt Keller of this town met with an accident while riding a bicycle in the Hat last Saturday evening. He was hit by a passing car and sustained cuts bruises which rendered him unconscious. The car did not stop butKeller was picoked up by passers by and taken to the policestation. Although badly bruised and cut his condition is not coonsidered serious.

Crop Results Are Better than Expected

Prices And Quality of Wheat are Better Than Last Year

From returns received from threshermen so far this season it is estimated that the wheat crop will average between yl and 12 bussels per acre in Alberta. The total crop this year is estimated at just about half what t was last year. This year however the grain is grading much higher and there is a great preponderance of No. 1 hard than ever before in the history in the history of the pprovince.

All grain this year is averaging No. 1 and No. 2 as compared with No. 3 and No. 4 last year. This together with the considerably higher price per bushel this year, means that the net return to the farmer will be nearly as great as last year

These estimates should serve as a tonic for the pessimists who have been predictiny a hard winter and business stagnation because of crop conditions.

Good Shows at Cameo Next Week

"Ranger," the dog wonder will be the big attraction at the Cameo next Monday evening in the picture, "Dog Justice. The acting and intelligence shown by Ranger are pronounced by all as wonderful. There will also be a good comedy and the 10th episode of "The Tiger's Shadow."

As versitile a troupe of comedians as ever was gathered together in one production is to be found in the cast of "Lady Be Good," the picture to be shown at theCameo next Thursday. Jack Mullhall plays the part of a vaudevil magcian and, believe it or not, all the tricks you'll see were performed witohout the use of camera deception. There is also a good comedy.

Conservatives Sweep Ontario in Election

Overwhelming Victory Given To Ferguson Government

In the general provincial election held in Ontario Wednesday, the Conservative party led by Hon. G. H. Frguson, swept the province by an overwhelming majority. Out of 112 constituencies 90 Conservatives were elected, making a net gain of 14 seats. The standing of the parties at the last summary was:

Conservatives	90
Liberals	9
Progressives	3
Independent Conservatives	2
Liberal Progressives	2
Deferred	1
Doubtful	4
Others	1

This is the strongest representation ever accorded any government in Ontario.

Th standing at dissolution was Conservatives 77; Liberals, 16; Ind. Liberals, 4; Progressives, 3 Othrs, 9 and vacancies, 3.

NOVA SCOTIA VOTES — FOR SALE OF LIQUOR

In the plebiscite on the liquor question in Nova Scotia, the people voted strongly in favor of government control and sale of liquor. The vote so far is 89,757 for and 41,180 against. Prince Edward Island is now the only province in Canada to have prohibition laws.

Miss Bessie Sneddon, formerly of Redcliff and a graduate of the Medicine Hat hospital training school, has recently been successful in passing the fall examinations for R. N.

10 a. m., Church School. Missionary Sunday and offering.
11:15, morning worship. Family Pew Suday. We invite fathers and mothers to come and bring the children and sit together in the same pew.
7:30 evening worship. Subject: "I believe in the Holy Ghost."
Midweek service on Wednesday at 7:30 p. m. We shall have the fourth in the series of the Kingdom of God.

ST. MARY'S CHURCH
Celebration of Mass. Second and fourth Sundays of each month at 9:30 a.m.

Prize Fight Opera Premiere

When the English Music and Folk Dance Festival is held at the Royal York Hotel, Toronto, from November 13 to 18, the spot light will be turned on the first performance on this continent on November 16 of "Hugh the Drover", opera by Dr. Ralph Vaughan Williams, one of the greatest of modern composers. Written around early 19th century scenes in an English village, the costumes are picturesque and the setting is peculiarly suited to the folkmusic which inspired the composer. The unique feature of the opera is the great prize fight between the hero and the villain, the stakes being the hand of the heroine. This is one of the most realistic scenes ever put on any stage, and is a fight from start to knock-out. The cries of the crowd, the staccato singing of the principal, the exhortations of the backers of the two men are blended with orchestral effects in an ensemble that is a tour de force of modern musical representation, leaving the audience breathless and as excited as if they were spectators gathered around the ring, in one of the most remarkable curtains ever seen on the theatre. The part of Hugh is to be played by Allan Jones, a brilliant tenor of Welsh extraction, who has been starring in the Deauville Opera and the Opera Comique of Paris. Cut shows grouping of the players just before commencement of the fight, with Hugh in the centre and his opponent stripped for action at left. Inset shows Allan Jones.

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statesmen of the world realized that unless something was done to remove those suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions lulled, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism, rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics, in the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Briand's proposal for a United States of Europe is economic, rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the France-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

Accelerated Schedules Feature C.P.R. Fall, Winter Time Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the Change of Life. It helps me and I cannot praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Mrs. D. B. Petrie, Wilton, Ontario.

Ask Your Neighbor

Sheep Ranching Expanding

Industry Is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

Visitors to the home of Charles Darwin, in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

The chrysanthemum was introduced into England from China about 1790.

A Real Necessity

"Don't Get Excited" Club Would Be a Boon To World

There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely uncovered. What we need is don't get excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is we get too excited over little things and not excited enough over the big ones. Agitation, loss of temper and surrender of self-command over the trivial annoyances of life are a sheer waste of time and energy. In most human affairs more can be accomplished through poise and placidity than through effervescence and seismic phenomena.

If a don't-get-excited club could be so organized as to conserve all the human voltage that now goes to waste through needless excitement it would mean that mankind had reached the suburbs of a new era.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. When the rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first does to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Pubnico, N.S., tells what these pills did for him. He says:—"I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work, and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Greatest Wheat Exporters

Canada Stands At Top Of the List As Exporter Of Wheat

Canada stod first as an exporter of wheat during the 1927-28 crop year, with exports of 255,062,278 bushels. The United States came second with exports of 168,307,000 Argentine, third with 155,268,000 and Australia forth, with 80,980,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,665,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have long since turned to this famous remedy and ceased to suffer. Mystery Of Steel Hardening

Steel Now Produced That Is Harder and More Ductile Than Damascus

Mystery and secrecy that for centuries shed romance over the art of steel hardening in America, has almost entirely disappeared, according to W. H. Elsman, secretary of the American Society for Steel Treating.

The famous blades of Damascus, tempered, says legend, by being run through the body of a slave, hold no secrets for modern swordsmiths. Steel is produced now that is harder than Damascus 'and possibly more ductile.

Dr. W. S. Carnes, a metallurgist, of Canton, Ohio, has produced a sword with which he can shave, and yet so ductile that he can wind it several times around his arm. It is of carbon vanadium steel. As recently as 10 years ago, some of the processes of hardening steel were carried on in gloomy and secluded basements. The officiating smith even wore a high silk hat, muttered abracadabras and made passes over the treating tank.

Potatoes played an important role. Half a spud was set afloat on the water. Where the potato came to rest was the best place to plunge the white-hot steel. During the war, a great stir was made when a group of steel treaters in Poughkeepsie, N.Y., could not obtain water from Sheffield, England. They thought this had given Sheffield steel its quality which steel treaters the world over had tried to imitate.

Today the process of steel hardening has become automatic with colored lights flashing the instant steel assumes the proper hardness.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory process, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Had Been There

"Travelled!" said a sailor in a train to a passenger who had questioned him. "I should think I have. I've been all round the world; over an' under it, too. There ain't many ports I don't know the inside of."

"Why, you must know a lot about geography."

"but only to coal the ship. Tain't "Yes, we did put in there once, much of a place, what I remember it."

Increase In Water Power

The mid-year review of water power progress issued by Hon. Charles Stewart, Minister of the Interior, shows almost 200,000 h.p. added to the Dominion's total within the half year.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Will Establish Sanitorium

The government of Manitoba has decided to devote the $250,000 voted at the last legislature, to establishing a sanitorium for tuberculosis children in Winnipeg.

Apples imported into England from Australia must in the future measure not less than two and one-quarter inches in diameter.

Hindu surgeons in early times used more than 100 different surgical instruments and performed difficult operations.

A penalty for failing to vote in elections is exacted in Czechoslovakia.

Daring Stunt Flyers

"Four Musketeers Of the Air" Defy Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McNab and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Siskin pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at around 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the planes gradually fall over backwards and fly for some distance upside-down.

Postal Revenue

Now On a Level With What It Was Three Years Ago When Letter Rate Was 3 Cents

Postal revenue is now on a level with what it was three years ago despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1296, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31st, 1926, the revenue was $31,025,000, and for the fiscal year ended March last, $31,170,000.

A census is to be taken in more than 200 countries and colonies next year.

Pay Visit To Northern Indians

Government Officials Return From a 2,000 Mile Canoe Trip

Following a 2,000 mile trip by canoe that took them through the wilderness of northern Manitoba and Saskatchewan, Dr. F. S. Leeder, public health department, Regina, and J. W. Waddy, Indian agent for Ile a la Crosse and The Pas agencies, have returned and have handed in their reports. The trip over the water trails of the north occupied more than two months. The officials were accompanied by four native canoemen from the Big Eddy Settlement, north of The Pas. The purpose of the trip was to investigate conditions among the Indians, to pay treaty money and distribute treaty supplies. The supplies consisted of clothing, ammunition and twine for the manufacture of fish nets.

Indians on the various reserves visited were examined by Dr. Leeder. Treatments were administered to those who were found to be suffering. More than 900 were vaccinated for smallpox.

"The Indians take to vaccine readily," says Mr. Waddy. "We had no difficulty since they regard it as a cure-all in many instances. They have not forgotten the smallpox scourge of 30 years ago. There was no smallpox in the camps. The vaccinating was done merely as a precautionary measure.

"From a health standpoint the Indians are as well off as last year. There is no flu to speak of. There is tuberculosis. Of the ten reserves visited, the worst seemed to be around Pelican Narrows."

Mr. Waddy found, in taking a census, that there were 128 women to every 100 men among the 2,300 treaty Indians visited. This, he says is due to the fact that the men live an arduous life, filled with dangers. Many are killed through accidents, and many are drowned.

"Some say the Indians are lazy," says Mr. Waddy. "They are not. They are on the portage most of the time, working, hunting, trapping; and they are putting up a great fight for existence. They depend a lot on hunting, fishing and trapping for their livelihood. In the far north they find few fish and live mostly on caribou. Sometimes there are plenty of caribou and other times, well, the Indians just go hungry.

"Fur bearing animals are gradually decreasing. The use of poison by white trappers has killed off a lot. This practice has been discontinued since the R.C.M.P. took over Saskatchewan again. Then the bush fires have destroyed the food of the fur bearing animals. Flames have done away with mice, rabbits, squirrels and birds. Forest fires destroy many of the young animals in their dens.

"During the trip we had but one general complaint from the Indians. That was about the restriction on trapping beaver. Some beaver trapping is done illegally by the whites. The Indian knows this. It is making him discontented with this special part of the game law. There would be little cry from the Indian if he thought the beaver were being conserved. The condition is worse in Manitoba in this regard.

"A decrease in the number of prospectors was noticeable on the trip. There were very few. Those who were in there were making a more intensive search than formerly. They were keeping quiet too. There is much activity north of the Churchill River. The outlook seems to be good.

"One thing we noticed was that the Churchill seems to be the northernmost limit of the song birds. There are few beyond. But along the river there were millions. Among them were innumerable robins.

Asked if the natives were obeying the laws, the agent stated that no complaints had been made to him.

The educational requirements, he said, were being looked after by the missionaries on the reserves. They were assisted by the department of Indian affairs. The missionaries also act as government dispensers of medicine for the sick.

Finishing Broilers

Valuable Advice Contained In Bulletin Regarding Feeding and Other Details

Late hatched chickens find a ready market as broilers when they are well fleshed. For broiler trade which calls for birds that are suitable for broiling, chickens should not exceed 2½ pounds in weight. Even those that weigh less than 1½ pounds to the pair find a market under the name of squab broilers.

In Bulletin No. 20, of the Department of Agriculture, at Ottawa, "Preparing Poultry Produce for Market," Mr. Elford, Dominion Poultry Husbandman, recommends finishing broilers on a palatable mash in a clean yard where the birds are not encouraged to run off their flesh with too much plan to move about. The mash is preferably mixed with milk, and should contain some green food. It is very important that the utmost cleanliness be observed both in the feeding utensils and in the yard and roosting places, and care must be exercised to keep the birds free from lice.

Bleeding through the mouth and dry plucking are advised for birds to be sold dressed. If the weather is warm and local killing facilities not good, it may pay to ship alive.

For dressed broilers the pasteboard carton 6 inches high, 6 inches wide, and 11 inches long is a very suitable package for 2 or 3 broilers according to their size.

How To Sleep

Should Curl Up Like a Cat, Say Scientists

New findings on how to sleep best were reported at a symposium on sleep at the ninth International Congress of Psychology at New Haven, Conn.

To curl like a kitten seems to give the greatest possible relaxation. Sleeping "like a log" may be a bad sign, a warning of overstrain. When sleep refuses to come, it is probably the muscles that bar the sand man's arrival.

"Prevailing conceptions of sleep were heavily shaken by experimental findings presented by 10 investigators," said H. M. Johnson, of Mellon Institute of Pittsburgh, chairman of the symposium, in opening up.

Motion pictures taken at the institute indicate that the greatest possible relaxation is in a coil much like a kitten's and in a sprawling posture resembling that of a swimmer. A bed that is too narrow or badly designed simply limits the number of postures that are favored.

Free Farm Lands

Increasing Demand For Free Homesteads In Western Canada

There is an increasing demand for the free homestead lands in Western Canada offered to settlers by the Canadian Government. In the first seven months of this year 9,031 entries for quarter-sections of 160 acres of homestead lands were made, an increase of 2,297 over the corresponding period last year. The 9,031 entries represent 1,444,960 acres of farm land.

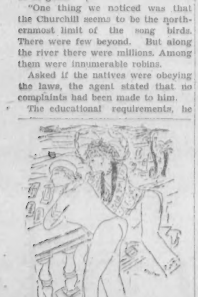

There still remains a considerable acreage of arable land in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia available as free homesteads, and millions of acres of fertile land near to railways, markets and schools can be purchased at prices from $15 to $20 an acre, with payments extended over a term of years.

A Faithful Clock

A clock in the Castle Rushen, Isle of Man, has worked continuously for 300 years, and has not needed adjustments until recently, when it was taken down for repairs. It is known as the Queen Elizabeth clock, and was presented to Queen Elizabeth in 1597. It has only one hand and three wheels.

Aerial Photography

During the 1928 season, 88,000 aerial photographs of areas in different parts of Canada were taken by the Royal Canadian Air Forces for the Topographical Survey, Department of the Interior. Of these 17,500 were oblique views and the remainder vertical views.

"I believe Mrs. Meyer's husband is drowning."

"How dreadful to be a widow before being divorced." — Jugend, Munich.

Mrs. Junebride—Somehow I can't help suspecting that you're leading a double life.

Her Husband—Nonsense! Only a single man can afford a double life.

If you are tall and skinny, eat Crisco. It's shortening.

English Language Spreading

Knowledge Of English Becoming Almost a Necessity the World Over

One of the remarkable developments of the present century is the manner in which the English language is spreading throughout the world. English is, of course, one of the two official languages of the League of Nations, and this means that it is almost necessary that anyone who aspires to represent his country at Assembly meeting or on one of the numerous League commissions should have a knowledge of the English tongue.

In the Orient, English is a sort of lingua franca. Many languages and many dialects are spoken by the teeming populations of Asia, but in addition to his native tongue, anyone who aspires to a position of importance in official or commercial life finds that a knowledge of English is not only a great convenience but very nearly a necessity.

In Northern Europe, the use of English is spreading rapidly. Norway and Denmark have made it the second language taught in their schools. nl Sweden, where German has long since been the second language, a movement is on foot to place English and German on an equal footing. In Finland, English is growing in popularity, and there are suggestions that, before long, it may replace Swedish as the second language of the republic. In Esthonia, where many languages are spoken, German, Swedish, Russian and Yiddish, in addition to the national language, English has been, since 1920, the second language taught to the native-born, and the third to the children who belong to the minority races. The London Spectator stated in a recent issue, however, that owing to difficulty in getting English texts and the cost of these, there was a possibility that the Esthonian schools might have to take up German for a time instead of English.

In Central Europe, English is also finding a foothold. A despatch from Prague, the other day, announced that it was being made a compulsory subject in the schools of Czecho-Slovakia, while special arrangements had been made for the instruction of adults in the language, and that radio lectures in English were to be given three or four times a week.—Vancouver Province.

Device To Facilitate Landing Of Packages

Invention Of Swiss Engineer Delivers Parcels From Airplane

A device to permit delivery of small packages from an airplane in flight has been invented by a Swiss engineer, the Department of Commerce reports.

The device consists of an aluminum shell, equipped with a precision watch and a parachute. The watch may be adjusted according to the altitude of the plane and the carrier will fall like a dead weight until about 3000 feet above the ground. At that point, the watch releases the parachute, permitting the package to land slowly near the desired spot.

A Fine Old Scot

Donald Fraser, ninety-year old Canadian Scot, of Victoria, would not pass up the opportunity of seeing brither Scots in action and was a picturesque figure at the Banff Highland Gathering recently held at the famous resort in the Rockies. Mr. Fraser's father came out to Canada 120 years ago, but he himself has never been to Scotland. He is typically Scottish in accent and appearance and plans to visit the homeland some day.

JAMES COLLEY

Assistant Superintendent of Colonization, Canadian Pacific Railway at Calgary, who has been appointed Superintendent, Department of Colonization and Development of the Company, Montreal, succeeding Mr. H. C. P. Cresswell, transferred to London, England.

Where Governments Are Quite Powerless

Religion Of People Something They Cannot Interfere With

Nothwithstanding all that is being said about the changing beliefs of the people of the world there is, nevertheless, an underlying principle of religion, active or dormant, everywhere. Man is a being that requires to worship. That is demanded of him by his own better nature. Dogmas may mean little, but deep in his nature is implanted that something which looks away beyond himself for something that satisfies an inner longing, call it whatever you please.

Governments or Soviets are powerless to dictate the religion of the people, and Sunday or Sabbath or whatever name is given as a designation, has a definite place in the lives of all; it is a part of their being, born in them and cherished by them.

What would the irreligious even in this land do or say were the Government to stipulate days of rest instead of that which tradition has passed on to all? There would be an uprising if any government should ever state what a man should believe or what place of worship he should attend. Man has won for all time a freedom in that direction that can never again be questioned, hence the innovation introduced by Russia of abolishing the Sunday, and giving two days of rest in place of it will not satisfy when all the people want the same day, to do with as they please.

Dinner By Airplane

Asuncion friends of Eduardo Pena, editor of the newspaper El Liberal, who tendered him a banquet Sunday, claim to have established a precedent when they ordered a sumptuous repast from a Buenos Aires restaurant 700 miles distant which was transported by airplane and served piping hot at the Asuncion Club.

New Feed For Cattle

"Grass Cakes" Very Nutritious and Are Readily Eaten

Canada this year has undergone the unusual experience of an abnormally dry summer season with a consequent failure of live stock and field productiveness. The supply of milk, "the ideal food," especially for children, has fallen to about half of normal, though, fortunately, this does not mean deprivation in their case. The position, however, should call attention to the new cattle feed, tentatively known as, "grass cakes," first introduced to public notice in 1927 by an agricultural professor in a conference in Cambridge University, England.

After the proof of the pudding at Cambridge, so striking were the possibilities of repeatedly mowing grasslands and converting the short, leafy, nutritious herbage into dried, compressed cakes that a special official report was prepared in 1928, dealing with the method of production. Investigations on "grass cakes" are still being conducted at Cambridge University, and by Imperial Chemical Industries at Jealott's Hill. The idea is that young grass, which approaches a good feeding cake in nutritive value, can be cut several times in the season, dried and compressed, so proving a feeding stuff of high protein content (25 per cent.)

This grass cake would be capable of ready transport and storage, and would be suitable for winter use in association with carbohydrate or starchy foods. It would also be rich in vitamins. Dr. H. H. Woodman of the School of Agriculture, Cambridge University, has devoted special attention to the question of "green cakes," and has suggested that in the future we may see large areas of grassland devoted to the production of protein concentrate in this form.

The cakes are of a density nearly equal to that of water, forty cubic feet of the former and thirty-six cubic feet of the latter weighing approximately one ton. Even denser cakes have been made and may become usual. "Grass cakes" as already made are of pleasant odor, have the fresh green color of grass, swell considerably and break up when soaked with water, and are readily eaten by cattle and sheep.

The First Lake Tragedy

French Explorer With Crew Lost On Great Lakes In 1779

Nowhere on the earth are there as many steamships in a given area as there are on the Great Lakes during the navigation season. The fresh water sea, crossed from May to November, and the work that they do has played a large part in building up the prosperity of Canada and the United States.

Two hundred and fifty years ago this summer white men sailed the lakes for the first time. The story is interesting and romantic, with a dash of mystery to add to its attraction. La Salle, the famous French explorer, was the skipper of the lakes' first cargo-carrier.

Not trusting himself to the frail canoes of the Indians for his amazing jaunt to the mouth of the Mississippi by an inland water route he built his own ship at the east end of Lake Erie. This ship, named the Griffon, was about the size of a modern fishing tug. La Salle had nothing resembling a chart. Jealous rivals had told him the lakes were full of reefs and sand bars.

Up the river went La Salle; up past the "flats" of Lake St. Clair and into Lake Huron. North of the straits of Mackinac, and on into Lake Michigan, dropping anchor at last off the Wisconsin shore in Green Bay, where a camp was established.

La Salle was heavily in debt. His party spent weeks collecting furs. Finally the Griffon was loaded with them and sent back, to carry them to Montreal and pay off La Salle's creditors.

The Griffon disappeared over the horizon on a bright clear morning—and vanished from sight forever. The first ship on the lakes had a short career. Somewhere between Green Bay and the head of the Niagara River, the Griffon went down with all hands—the first of a long line of ships to be lost to the fury of the inland seas.

Its voyage and the loss of its crew helped in a very real sense to pave the way for the present great traffic of the lakes.

Saved It Up

Two commercial travellers were discussing the character of a third. One defended him and the other disparaged his honesty.

"Well," said the first, "you must admit he has lots of moral principle."

"He ought to have," retorted the second, "for he never uses any."

More Trade With Britain

Hon. J. H. Thomas Believes Canada Should Enlarge Trade With Mother Country

"As far as Canada is concerned we are your best single customer for the greatest of your natural resources—wheat; and therefore I am disposed to look at the other side of the ledger. For every pound you spend with us, you spend five pounds with your neighbours to the south—the United States. I have thought of how far this situation can be met in a fair and legitimate way, and I have laid down certain cardinal principles. I have no right to try and injure any business you are doing, nor have I any such intention. But I am entitled to examine the goods you are buying from other people, the things you do not manufacture for yourselves; and I am entitled to say to you, not only because of the ties of kinship that bind us, but because it is good business, that you should deal as generously and as fairly with your best customer as you do with those who are not serving you so well as we are."

In these terms the Right Hon. J. H. Thomas, Lord Privy Seal in the British Cabinet, presented his views on intra-Empire trade to the Ottawa Canadian Club recently.

"The British Government knows there never existed such a need for substituting the peace mind. That is why Premier Ramsay MacDonald is going to the United States. And he is going to the United States to advocate the creation of a peace mind no matter what the consequences," he continued.

After touching on peace, he turned to the international relations of Great Britain. All nations should realize their dependency on others, he said, but some of the members of the British Government, prior to the recent conference at The Hague, had come to the conclusion that there was a tendency among other nations to misunderstand England's readiness to give way and compromise. That was why Chancellor Snowden had taken the stand which he did at The Hague.

"He did not go to The Hague to boggle and haggle over a few million dollars," Mr. Thomas declared, amid applause. Mr. Snowden had taken his stand at The Hague because a time had come to show the world that Great Britain is not always prepared to compromise for the benefit of others, and that when a question of principle is involved she is ready to take a firm stand.

He had decided when visiting Canada, said Mr. Thomas, that it would be extremely unwise to discuss either "our political affairs or yours." The political affairs of each country were that country's business. On the other hand there were certain large questions on which the Dominion was entitled to information as to the stand of the British Labor Government. The first of these things, said Mr. Thomas, was peace. Here, Mr. Thomas made his reference to the visit of Mr. MacDonald to the United States. Then he spoke of the stand Mr. Snowden had taken at The Hague. He followed with brief reference to the British constitution.

Saskatchewan Coal Mines

More coal mines are operating in Saskatchewan than in Nova Scotia, according to the weekly News Letter of August 17, 1929, issued by the Canadian Government Information Bureau. Of the 437 coal mines operating in Canada, 392 are in Alberta, 55 in Saskatchewan, 40 in Nova Scotia, 35 in British Columbia, 14 in New Brunswick, and one in the Yukon Territory. More than $146,000,000 is invested in these mines which give employment to more than 28,350 persons.

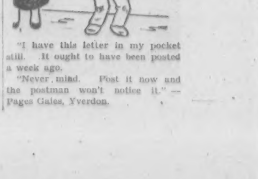

"Where does your father work, sonnie?"

"He used to work in a brewery, but he got the sack."

"Got the sack! What for?"

"For stock-taking."

In a single season banana trees grow from 30 to 40 feet in height.

"I have this letter in my pocket still. It ought to have been posted a week ago.

"Never mind. Post it now and the postman won't notice it." — Pages Gales, Yverdon.

WORLD HAPPENINGS BRIEFLY TOLD

New Zealand will appoint a trade representative in Canada, it has been announced. Growing commerce between the two countries is given as the reason.

The monoplane Bremen, first to cross the North Atlantic from east to west, is to be placed on permanent exhibition at the Museum of Peaceful Arts, in New York.

A young peach tree bearing a fruit, half of which was a peach, and the other half a nectarine, was exhibited at the recent show of the Royal Horticultural Society in London, England.

Exports of Canadian wheat during the month of August totalled 10,156,266 bushels with a valuation of $14,397,493, according to returns compiled by the Dominion Bureau of Statistics.

The R-100, British dirigible now under construction at Cardington, England, which was expected to make a trans-Atlantic flight to Montreal this fall, will not do so until next May, according to officials of the Department of National Defence.

Hon. Dr. Robert George Brett, pioneer medical practitioner in Alberta and one of the most outstanding public men in the province, died recently in Calgary, at the age of 78, after an illness extending over several weeks.

Lord Ypres, son of the late Field Marshal, plans to leave for the United States shortly, to exhibit his paintings. Lord Ypres paints his pictures in a studio built in the garden of his home, Ivy House, built during the reign of William III.

Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a nonewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

French Bakers Celebrate

Commemorated Four Hundredth Birthday Of the Doughnut

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous comestible was made in Paris in 1529. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hoe and molded the doughnut round the vacant space.

Promoting Trade Welfare

Six Apprentice Grocers From Great Britain Now Touring Canada

So that they may know better the Canadian goods they will handle over the counters in their shops in England, and to promote the welfare of trade between the mother country and the Dominion, six apprentice grocers from Great Britain are now touring Canada, under the auspices of the Department of Trade and Commerce, with the co-operation of the Canadian National Railways. They were selected for the tour by an essay competition conducted by the British Institute of Certified Grocers for the Department of Trade and Commerce.

Clue To Unsolved Mystery

McMillan Expedition Finds Traces Of Frobisher Party, Lost In 1576

A clue to an unsolved mystery of nearly 400 years' standing—the fate of five men left on Kadlunarn Island by Sir Martin Frobisher in 1576—is reported by Donald B. MacMillan, on his return here from over two months' exploration voyage to Baffin Land.

On an island on Countess Warwick Sound, the famous explorer discovered an ancient stone house which the Eskimos said was the work of white men. Inside were the bones of a bear and other evidence that it had been used as a shelter. The age of the moss and other particulars pointed to the dwelling being contemporary with Frobisher.

Kadlunarn was also visited and there the party found, in a very fair state of preservation, the house built by Frobisher in Queen Elizabeth's day. Digging in the earth floor, they discovered some pottery and other relics belonging to that period; also traces of the ship-ways down which the intrepid explorer launched the boats they built after their ships were crushed in by ice.

It was hitherto supposed that the five men left behind by Frobisher on one of his three voyages made attempts to build a fort to protect the supposed gold mines and had been killed by Eskimos. Careful enquiry among the natives reveals a tradition that the white men were not slain, but built a big boat and set out on their perilous return to England.

The relics now found by MacMillan indicate that they had proceeded only about fifty miles when their frail craft was crushed by icebergs, and one or more escaped ashore and built the shelter in Countess Warwick Sound.

Three Year Old Makes Long Journey

Little Boy Travels Alone From Liverpool To The Pas, Man.

Albert Pilkington, aged three years, stepped off the Continental Limited in Winnipeg recently, clutching in one hand a ticket that was taller than Albert by many inches, and in the other "Bosco," a mechanical doll, who had accompanied him all the way from Liverpool. Albert, or Bert, as he insists on being called, was en route to The Pas, where his father sent him to be looked after by an aunt upon the death of his mother. He sailed on the SS. Regina, in charge of the captain of that ship, and at Montreal was turned over to the care of George Cosgrain, Canadian National Railways conductor, who looked after him on the journey from Montreal to Winnipeg.

When the Continental Limited reached Winnipeg, Albert gravely climbed down from the train, shook hands with his friend the conductor, smiled for the photographers, and announced that he wanted an automobile ride. Bert was promptly accommodated, and when he boarded the train for The Pas, on the last leg of his journey, he gave his opinion that "Boats were very nice, and automobiles were even nicer, but, what Bert liked best of all, was "riding on a train." This winter when Albert is in the North he will have the thrill of riding on a dog sled, but until that time the railways have a certain small and enthusiastic booster.

Survey Of Dairy Industry

Data On Dairy Cows In Saskatchewan Soon To Be Available

Making Saskatoon his headquarters in his survey of dairy industry for the province of Saskatchewan, Dr. George Misner, of the Department of Agricultural Economics, at Cornell University, announced that the actual taking of records will be completed about the end of this month. Figures will then be available on dairy cows on about 550 farms in Saskatchewan. Particular care has been taken to secure a fair average of the herds.

Dr. Misner has been furnished with a staff of assistants in the survey work by the Department of Agriculture, at Regina. Although figures as to the cost of producing and distributing milk for Saskatchewan will be ready soon, Dr. Misner does not think this will exhaust the usefulness of the data gathered. He expects the department will have further work when this is completed. The survey is financed from the surplus of the Canada Wheat Board of 1920, which was set aside for agriculture research.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders are expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Research Possibilities

By Dr. H. M. Tory, President National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could write down the formulae for all combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that lies before the chemists of this country in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries $750,000,000 which produced $500,000,000 worth of products, while in the United States the corresponding production amounted to approximately $7,000,000,000.

James Fenimore Cooper could not write unless he was chewing gum drops, it is said.

Women In Airplane Factories

Are More Adept At Finer Adjustments Than Men

Much of the most exacting work in the construction of an airplane is done by women workers. Builders have found that women are most adept at shaping and sewing the fabric covers of wings and making certain delicate adjustments on the wings and struts of airplanes. Also, they are often called upon to plan the decorations of the interiors of planes built on special orders.

Major Reuben H. Fleet, president of Fleet Aircraft, Inc., of Buffalo, has many women workers in his plant. "We find that women can do the complicated work of covering the wings and assembling ribs and fitting them more accurately and in less time than men," he said.

Recipes For This Week

(By Betty Barclay)

CARROT MARMALADE

12 raw carrots.
4 cups sugar.
3 Sunkist lemons.
1 teaspoon ground cloves.
1 teaspoon ground cinnamon.
1 teaspoon ground allspice.

Grate carrots, add sugar and let stand one hour. Add lemon juice and spices. Cook slowly for one hour. Turn into sterilized jars and seal when cold.

SEEDLESS BLACKBERRY JAM

The seeds of blackberries are very objectionable to many, so it is well to get rid of them. Mash berries, cook in their own juice until thoroughly heated then remove seeds by pressing through a fine sieve. Measure pulp and liquid and allow one cup sugar for each pint. Add sugar to pulp and cook rapidly until thick, stirring frequently. Pack in clean, hot jars and seal.

Natural Gas Exploitation

Exploitation of the district along the South Saskatchewan River, in the neighborhood of Riverhurst, with a view to ascertaining the possibilities of natural gas is to be undertaken on a more extensive scale within the next few weeks, it is reported.

Served In Riel Rebellion

Captain H. O. Gray, 74, for years a crack rifle shot on teams representing Canada, died in a hospital at Ottawa. He was a member of the Ottawa sharpshooters during the Riel Rebellion in 1885. He was a member of the council of the Dominion of Canada Rifle Association.

The man who feels a small job beneath him is invariably too small for a bigger one.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B., writes:—"My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved.

"I have used it for the other children, and my husband and myself. My husband gives it great praise, and when he goes away from home to work he always takes a bottle with him."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

Lure Of the Northland

Ottawa Deluged With Inquiries Regarding Port Churchill

The lure of the North is strong in the hearts of the Canadians. Any one doubting this should see the correspondence pouring in on the Department of Railways and Canals asking to be allowed to go to Churchill. The flood of requests started when a news item announced that it might be possible trains would be running by the end of the month.

Every one seems to be wanting to go North. The requests come from Boards of Trade wishing to send parties up there from Legislatures wanting representatives on the ground, big commercial interests desirous to be early on the scene and the great mass of individuals who want to grow up with the port. It is rather embarrassing to the department, because at present the only buildings at Churchill are those to house the men engaged on the dredging and the railway construction. The only food supplies, there are those belonging to the Government.

Hon. C. A. Dunning, Minister of Railways, announced Sunday that his department was preparing a statement which will be published soon, explaining the whole situation there. During the summer the construction gangs have continually been called upon to feed adventurous people who made their way by air an otherwise to Churchill without making any provision as to what they should eat after they got there.

The Manitoba Government will have the job of supervising the building of the town. The Federal department is concerned only with the railway and the port improvements. It looks as if Churchill would be a Mecca for tourists from the start and the first call will be for a hotel.

Juveniles To Compete

Boys' and Girls' Swine Clubs Membership Is Necessary

More than five thousand boys and girls on Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces this year, for which the Canadian National Railways offer prizes and trophies, it was stated recently by Dr. W. J. Black, Director of Colonization and Agriculture of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition, the work of the clubs has progressed rapidly, particularly with respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent. increase over last year.

Barcelona Taxes Postage

Barcelona citizens have been subjected to various taxes to help defray the enormous expenses of the International Exposition. All letters posted in Barcelona must, in addition to the regular postage, bear an exposition stamp of five centimos (about three-quarters of an American cent). A tax of 1000 centimos is levied for each long-distance call and each telegram originating there.

Wheat Marketing On Protein Basis

Dr. Robert Newton, professor of field crops, of the University of Alberta, has been asked by the National Research Council, of Canada, to make investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Minard's Liniment — Used for 50 years.

Huge Milk Shipment

Largest Consignment Of Its Kind Shipped From Aylmer To Western Canada

Seven hundred and fifty thousand cows working in high gear for one whole day could contribute just enough milk to make up a shipment which left Aylmer, Ont., on a special Canadian National Railways freight recently for the west. Product of an Aylmer Milk Evaporating Company, it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 200 cars. There were 11,880 cases containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,500,000 pounds of fresh milk to make up this shipment at the largest evaporated milk plant in Canada. The product has a value of $65,000 and is pointed to as a sterling example of an extension of the dairying industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is, in the biggest part, for consumption throughout the prairie provinces.

Take Pride In Canada

Only Necessary To Travel the Length Of This Dominion To Stir Up Patriotism

Proud of being a Canadian before he took a recent trip to western Canada, Dr. C. B. Oliver, of Chatham, Ont., is even more proud of his nationality, since he has once more travelled through Manitoba, Saskatchewan, Alberta and British Columbia. The more he sees of the Dominion, the prouder he is of Canada. His patriotism needs no artificial stimulus. All he requires is to see his Canada. Every citizen of this Canadian nation has a perfect right to be proud of his country. The more a person travels in Canada, the more he appreciates the wealth of this land; and the more the Canadian travels in other countries, the more he realizes that in Canada he can find facts and opportunities to equal anything he sees elsewhere.—Border Cities Star.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

It is estimated that about six or seven persons out of every million are struck by lightning.

Just place a glass or cup over the opened tin and the contents will keep perfectly. Eagle Brand has been the leading baby food since 1857.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part owner of the fashionable Club Bombo, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was suddenly kissed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is moody. When she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

Al heard Molly's step and turned to embrace her. She deftly avoided his grasp, stifling the look of aversion in her eyes as she did so. Al thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand.

"Sh!" she murmured in an irritated voice. "Don't wake him. I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a word or two with little Junior. So as Molly turned away to go to her own room Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and, as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face in spite of herself. There stood Al, pretending surprise that Junior had awakened, but obviously delighted that it had happened. He quickly leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Came home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indicision upon her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered petulantly. "You're spoiling my orchids."

Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap, the baby began to chat volubly. He was thoroughly wide awake and Al forgot his chagrin over Molly's irritability in his delight over Junior. Was any sound as sweet as that high childish treble?

"How big are you, Junior?" he asked.

The baby's tiny arms were spread wide as he gave the required answer:

"So-o-o big!".

Al's head went back, as he laughed delightedly, just as if they had not gone through that nursery ritual a thousand times. Then Junior turned and demanded, "Now, daddy, tell me story."

"Story?" repeated Al. "What kind? Animal story, giant story?"

"Frog story," answered Junior briefly, settling down comfortably in Al's protecting arms.

"All right," agreed the father. Now listen closely. Once there was a fat old froggie who lived in a hole in the ground under a great big tree. He had a big deep voice and—"

Al glanced down—Junior's eyes had closed. He tried desperately to hold them open, but again they went shut as the story continued. . . . When the tale was ended he was sleeping quietly. Then Al, singing to him softly, put him back into his bed and tucked him in. His toy was placed beside his open hand where he would see it first thing in the morning, and then—one last adoring look, a quick kiss, and Al tip-toed from the room.

Molly had disrobed the moment she reached her room and slipped into a negligee. But her door was open and, as she went about the business of cold-creaming her face, she could not help but hear the sounds of joy and perfect comradeship that came from the nursery. Somehow, they cut into her consciousness like acid on a raw wound, so that she quite forgot what she was doing. The anger she had felt and stifled when she entered the apartment now returned in greater force than ever. It seemed to her that everything that Al had done tonight irritated her. Even his presentation of the brooch had a bad conclusion, for it had made John Perry discreetly withdraw from the party. And Al's pride in her and love for her, instead of soothing her vanity, worked just the other way.

At this moment she glanced in the mirror to see Al approaching from behind, his face aglow with that same expression of joy and devotion. As he came closer and slipped his arms around her she jumped up and stepped out of the embrace, making no attempt to hide her displeasure. Before Al could say anything in protest she had crossed the room.

He shook his head in astonishment. Oh, well, he thought philosophically, it was just another of Molly's moods. He made a move to cross over to her, but suddenly Molly's white arms went above her head in protest. She stood glaring at him, like an animal at bay.

"What's the matter with you, Molly?" he asked sharply, in amazement. "What have I done? For weeks you haven't seemed like yourself!"

There was challenge in Al's voice, but there was pleading, too. The expression of aversion left Molly's face; desperately she struggled to think of an explanation that would smooth things over. But it was no use—she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy—a beautiful home—a baby—me?"

But Molly seemed to grow harder with every word he uttered. Her icy silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. Was there nothing he could say to arouse her—to drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"You act as though you didn't love me—any more. Don't you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a show-down. Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minute they were out a look of disdain curled her lips and her eyes flashed defiance. Now—at last—she had come clean. Now, her attitude said, what was he going to do about it?

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and come echoing back.

But finally Molly could stand the silence no longer.

"You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now, he thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to hurt him with all the cruelty in her power, driving forever that adoring look from his eyes.

Al did not cringe as he listened to her, yet he knew at last that their life and comradeship together were utterly smashed. His face was pale as death. But as they faced each other, eyes agleam, hands clinched, they heard another sound like the faint sweet tinkle of a bell. It was Junior's voice, calling gently:

"Mamma. Please come to me."

(To Be Continued.)

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Kech, Lindberg, Alta., is one of these mothers and she writes as follows: "I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulates the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Car Accidents In Iceland

Increasing Number Of Automobile Accidents Presents a Problem

Iceland, of all places under the sun, is complaining of its growing number of automobile accidents.

Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, makes for more accidents.

An auto bus took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities hailed the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

Kill that corn with Minard's Liniment.

"Ain't you going to get up and fight? I told you you've got him going."

"That's all right, you tell me when he's gone."

"Electric Man" Puzzles Doctors

Receives Shock When Using Telephone Or Radio Headphones

Frederick Stone, a chauffeur at Holsworthy, north Devonshire, England, is so charged with electricity that:

(1) He cannot use a telephone or wear a radio headphone without receiving a shock, and

(2) He cannot drive his automobile or walk without wearing vulcanite insulation pads in his shoes, and

(3) He can locate buried gold, silver and copper.

This strange "electrical" man has spent 20 of his 49 years in hospitals puzzling doctors.

A phone test of his divining powers has been held at Plymouth Municipal Museum under the supervision of the curator. The electric man located without trouble buried nuggets of gold, gold-bearing quartz and even gold jewelry.

Stone finds hidden gold and copper by means of a wand consisting of an ordinary steel clock spring. This twists and wriggles in his hand like a snake when he approaches buried treasure. The number of wriggles denoted the number of feet he is away from the exact spot.

Discussing his unusual gift, Stone said that these divining spells put a great strain upon him and were always followed by periods of intense lassitude.

"The only way I can get relief from the electric currents when I am thus overdone," he said, "is to touch wood.

"I enjoy listening to the wireless by loud speaker, but as soon as I put on a pair of headphones I feel physical helplessness as if I had received a blow on the head. I cannot use a telephone without intolerable discomfort.

"I once wore my wife's wrist watch and it came all to pieces. I must be supercharged with electricity."

Little Helps For This Week

"Watch therefore, for ye know not what hour your Lord doth come."—Matthew xxiv. 42.

Think not I dread to see my spirit fly
Through the dark gates of fell mortality;
Death has no terrors when the life is true;
'Tis living ill that makes us fear to die.

—Omar Khayyam.

When the hour of death comes,—that comes to high and low alike—then it's na use that ha done for ourselves, but what we hae dune for others that we think on maist pleasaintly.

—Sir Walter Scott.

When a man dies, they who survive him ask what property he has left behind. The angel who bends over the dying man asks what good deeds he has sent before him.

—The Koran.

Pity the Editor

A Difficult Matter To Be Popular With Everyone

It is likely editors are the most unpopular people in the world. If they try to please one group, they offend another. If they express honest convictions, which they usually do—narrow critics to the contrary notwithstanding—they are by many misjudged and discredited.

If perchance, at rare intervals, an editor hears of no error that has crept in or feels no assault on his idea of what should or should not be published, he is profoundly relieved—almost happy. He does not need commendation for any meritorious thing he has written or done to make him measurably satisfied with life. All he needs is freedom from the sharp stabs of those who are looking for imperfections or grounds for disagreement. There is no closed season, and often he is lambasted without knowing it, but if he doesn't know it, he is not hurt, and he may even imagine he has escaped by unanimous consent.

We would counsel the young who contemplate journalistic careers to develop thick and tough hides as a preliminary step, and leave behind all desire to run for office, or to win in any other form of popularity contest.—Benson, Minn., Monitor.

The Professor—After your motion for a new trial has been denied what is the next step to take?

The Pretty Girl Student—I'd cry a little.

You can take lessons by mail to increase your will power or you can practice getting up at night for another blanket.

DIAMOND DYES are the finest dyes you can buy. They are made to give you real service. *They contain the very highest quality aniline that can be produced.*

It's the quality of the anilines in Diamond Dyes that give such soft, bright, new-looking colors; that make them go on so evenly—without spotting or streaking; that enable them to keep their depth and brilliance through wear and washings.

Next time you have dyeing to do, try Diamond Dyes. See how easy and simple it is to use them. *Then compare results.* You will surely agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye *or tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes
Sun Proof
EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors; brilliance and permanence.

Idea May Be Feasible

Berlin To Now York In Six Hours Is Plan Of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York!"

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinz-Guenther Perl, a 21-year-old Berlin engineer. Perl claims that his 'plane would make the trip from Berlin to New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Zeppelin studied his device carefully, approved of it and now firmly believe in its feasibility.

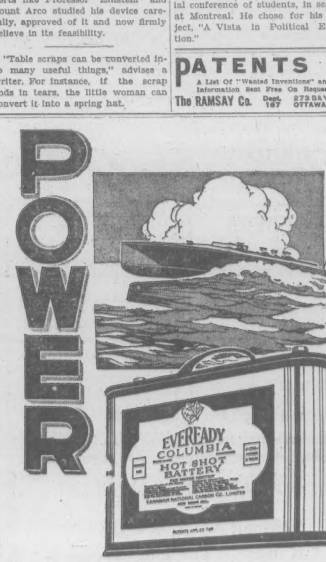

"Table scraps can be converted into many useful things," advises a writer. For instance, if the scrap ends in tears, the little woman can convert it into a spring hat.

Bulwark Of Civilization

Sir Robt. Borden Says British Commonwealth Of Nations Is a Model

The British Commonwealth of Nations stands today as a model to the League of Nations. To destroy its unity would be a crime against mankind. So stated Right Hon. Sir Robert Borden, Canada's war-time prime minister, at a luncheon of the Canadian Club at Ottawa. Sir Robert was speaking on the occasion of the entertainment by the Canadian Club of the National Federation of Canadian University Students and other delegates to the second imperial conference of students, in session at Montreal. He chose for his subject, "A Vista in Political Evolution."

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians for 50 years since its invention. One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggistore.
